

# Use of CellerateRX Surgical, Hydrolyzed Collagen Powder in Hip Replacement with Comorbidities

Blaine Farless, MD  
Cleburne Orthopedics & Sports Medicine

## Patient History

- Obese
- Diabetic

Patient had previous hip replaced. The wound took 8 weeks to heal using wound vac. Patient needed other hip replaced. With this procedure, CellerateRX surgical was applied along with wound vac. Delayed the wound closure at post-op day 3. Wound healed with no further treatment.
